

Hader CX Extracoronal Attachments on Dental Wings

## Digital Library

**DESIGN EXAMPLE GUIDE** 

## DESIGN OF A PARTIAL DENTURE WITH HADER CX EXTRACORONAL ATTACHMENTS.

Digital workflow of a Laboratory case using Dental Wings CAD-CAM system

Visit our website at www.hader.eu, or scan the QR code to request the Digital Library, and follow our User Guide for installation.

dental wings **exocad**3shape

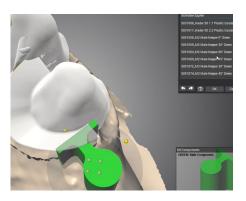

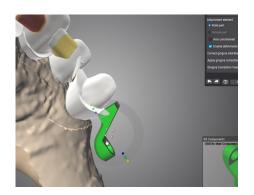

Open the digital case model.

Select the base structure and click on "Add Attachment Items"

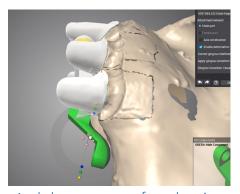

Find the Hader Male Keeper with the angle that better adapts to the case anatomy

Place it in the desired position

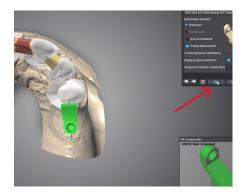

Make sure it follows the center of the ridge

And leave space for cleaning under the keeper

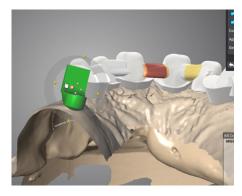

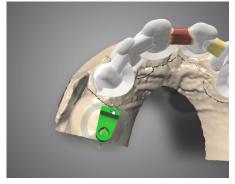

When ready, click "OK"

The element will change colour to white to indicate completion

Select a new element

Repeat steps for the opposite side of the construction

Ensure using an angle of keeper that adapts to the anatomy of the ridge.

The construction is ready for manufacturing

\*Metal structure fabricated using milling technology

\*Prosthesis fabricated using conventional techniques.

## THE ATTACHMENTS YOU TRUST, NOW IN DIGITAL

The Hader Digital Library offers a treasure of digital files for our renowned Hader attachments, including the CX, VX, and SX systems. Craft prostheses that fit perfectly and provide superior patient comfort, all at your fingertips.

## CAD-CAM KIT USED FOR THE PRODUCTION OF THIS DENTURE

**HADER CX** 

5012017 Hader CX 017 CAD-CAM All relevant kits are easily identified in the catalogue of products with the CAD-CAM logo
